

## PFAS DECLARATION

Dear Valued Customer,

Solen Kablo San ve Tic AS is aware of Laws and Regulations to protect public health and the environment put forward by the EU, USA, and other regional marketplaces to impose restrictions, stringent control measures or ban entirely use of PFAS materials. We are committed to compliance with regulations and industry standards for environmental health and protection and to striving to meet our customers' needs.

Per- and polyfluoroalkyl substances (PFAS) comprise a "Class" of organic alkyl (carbon based) substances in which the carbon-hydrogen groups on which all (Per-) or many (Poly-) of the hydrogen atoms have been replaced with fluorine. PFAS is the widest definition and class name for all chemicals containing CF<sub>2</sub> or CF<sub>3</sub> groups. This includes discrete small molecules, monomers, and short chain fluorochemicals used as part of a polymerization process.

ECHA (European Chemical Agency) made PFAS restriction proposal. Perfluoroalkyl and Polyfluoroalkyl Substances (**PFAS**) can be found in numerous types of building products including wires and cable products due to their desirable functions such as weatherproofing, **corrosion prevention**, and stain resistance.

**Solen Kablo** declares that knowingly our cables do not contain any PFAS or any other fluorinated substances and does not use PFAS substances in the manufacture of its products.

Sincerely,

**SOLEK KABLQ SAN.VE TIC.A.Ş.**
